

MARITIME

VOKKERO®, VOKKERO, THE WIRELESS COMMUNICATION SYSTEM FOR MARITIME PROFESSIONALS

**Hands-free system,
instant communication**

Patented noise filter, suppression of background noise

**Continuous conference for
unlimited users**

**Multichannel, several systems
on the same site**

**Digital encryption,
secure exchanges**

Intuitive to use

**Increases your
performances**

**Headset & smartphone
connection, call handling**

**No communication
costs**

COMMUNICATION IN A MARITIME ENVIRONMENT

Captains, mates, crew chiefs, crews, dockers, machine operators, anyone who is involved in ship manoeuvres or embarkation, disembarkation or even transshipment operations.

To ensure the smooth running of the various activities on board, communication between the various players is essential. To do this, they must have an intercom that ensures permanent and perfectly audible exchanges, while preserving their mobility and their available hands.

How? By using the Vokkero® Guardian radio communication system, THE wireless intercom solution to stay in permanent radio contact while keeping hands free.

Instantaneous communication enables decision-making in real time to optimise the work in progress and immediately deal with any difficulty that may hinder the smooth running of shipyard or shipboard manoeuvres.

As a hands-free system, Vokkero® Guardian enables you to remain focused on the task for optimal security.

A major advantage on-board communications, as confirmed by the profession, is the ability to connect a Vokkero® Guardian system to most existing wired intercoms for permanent contact between the mobile teams and the gateway or a control room.

Tested by crews for many years, Vokkero® is the reference for wireless intercoms for professionals in the naval, river and port sectors.

**SHIP, CAPTAIN, SHIPYARD, STEERING,
MOORING, CABLE LAYERS, TOWING,
DOCKERS, CRANE OPERATORS,
HELSMEN**

RADIO COMMUNICATION FOR A PROFESSIONAL AND SECURE NAVIGATION.

Range >	Up to 1 km
Battery life >	Up to 12 hours (Rechargeable Li-Polymer battery)
Frequencies >	Royalty-free according to radio regulations in Europe (ETSI) and US, Canada (FCC)
Weight >	250g (including battery)
Dimensions >	70 x 110 x 28mm
Operating temperature >	-10/+50°C (14/122°F)
Call function >	Alerts the user by vibrating or emitting an audible signal
Recharging >	4 hours max. charging time
